CAREER OBJECTIVES

I have over 2 years of experience in developing website systems based on the MVC platform. I have accumulated solid knowledge and skills in programming languages such as PHP and Java on the backend, combined with HTML, CSS, JavaScript, jQuery, ReactJS, and Next.js on the frontend.

I always aim to apply and maximize my capabilities in a professional and dynamic work environment. The programming team at the company has helped me develop quality and utility products, thereby enhancing the company's brand value. I see facing challenges at work as a precious opportunity to gain experience and become a professional programmer. My goal is to advance my career in this field and aim for higher positions, contributing to the development of website systems in the future."
